DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:
[Claim 1]: A solid-state image pickup device comprising "a pulse signal is again input to each of the reset switch and the transfer switch to turn said switches on together at least in a predetermined period thereby to again reset a second time an electric charge at said photoelectric both said first and said second resetting of an electric charge being carried out for each frame" in combination with other claimed elements.
[Claim 17]: A solid-state image pickup device comprising "such that successively after an electric charge is again stored in the photoelectric converter and then transferred to the input terminal for a signal amplifier, the reset switch and the transfer switch are again turned on together at least in a predetermined period to again reset an electric charge at the photoelectric converter" in combination with other claimed elements.

The following prior art shows the current state of the art in regard to this patent application:

- i. Saitoh et al. (US Patent # 6,377,304) discloses a method for exhibiting faster video frame rates and a method for removing residual charges in the horizontal and read-out lines and capacitors by momentarily resetting a path to ground for the residual charges in each read-out line (col. 4 lines 50-65, figure 22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
